

Singtel Satellite

Product Factsheet

Sat-BoD and Sat-Secure services

**Trusted backup connectivity
to ensure you are always in business**

The Singtel logo consists of five red dots of varying sizes arranged in an arc above the word "Singtel" in a bold, black, sans-serif font.

Sat-BoD and Sat-Secure

Having continuous access to communications services is a vital part of any businesses. Sometimes, unforeseen events such as cable cut or terrestrial connectivity outages can knock out conventional network connections to your sites. The impact can be significant - costing businesses millions of revenues, incurring support cost and loss of data.

In the event of an outage, you can count on Sat-BoD (Bandwidth on Demand) and Sat-Secure (VSAT Backup) services for continuous secure and reliable connectivity. Working jointly with your terrestrial links, our backup service offers true business continuity.

Who should consider?

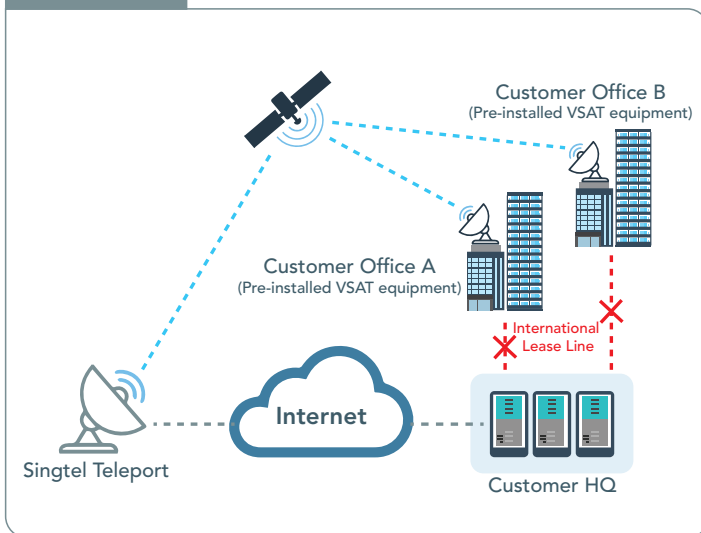

Sat-BoD and Sat-Secure services will suit businesses that require backup plans to ensure communication continuity when terrestrial links fail. We expect to see usage in industries such as:

- Broadcast and Media
- Energy and Utilities
- Healthcare
- Humanitarian relief
- Mining

Benefits

- **Coverage** – High performance C and Ku-band backup covering Africa, Middle East, Southeast Asia and Pacific Islands.
- **Reliability** – Service can be activated within 2 hours*
- **Cost** – Affordable monthly recurring cost and pay-per use scheme for bandwidth usage
- **Customer Support** – managed and supported 24/7 by a team of professional technical personnel
