How it works

When you are in a spot on the globe where you cannot afford to be cut off from everyone else in the world, you need IsatHub. This portable device allows you to stay in touch with your family and friends.

IsatHub is designed to work seamlessly with your smartphone or tablet so you can remain in contact no matter where you go. You can update Facebook, send text messages or emails, post a photo to Instagram, call any mobile phone or landline anywhere with your iOS or Android phone or tablet device.

As it is compact and lightweight, IsatHub can be stowed in briefcase or backpack wherever you need to take it along with you.

Features

- Seamlessly connect with smartphones and devices
- Compact & Portable
- Quick & Easy Setup
- User-friendly Interface
- Managing costs effectively

Benefits

- Receive connectivity even if your device is for WiFi use only
- Control App allows full control over access to the service as well as visibility of data usage
- Voice App enables the use of smart device to send and receive voice calls as well as text messages
- Contacts can be imported easily from your smart devices
- Enables up to 5 simultaneous connections

IsatHub at a glance

- IsatHub operates over the Inmarsat-4 (I-4) satellite and ground network, which operates globally, except for extreme polar regions, at an average availability of 99.9 per cent
- The service is accessed via a control and voice app downloaded onto a smart phone or tablet
- These apps connect to the I-4 network via a satellite terminal that has been type approved to work over Inmarsat's network
- The IsatHub Terminal from manufacturing partner AddValue, is the first terminal to access the IsatHub service
- IsatHub Terminal is lightweight, highly portable and is quick and easy to set up with no technical expertise or training needed, enabling you to establish an online connection with IsatHub within minutes
- The terminal has a 30 metre WiFi range and multiple devices can share the same connection
- Power consumption is low and the battery can be recharged by mains or by solar power
